

Fruit harvesting machine OW 85

small – handy – high-performance

Persuasive technology

- easy operation
- elaborate construction
- reasonable weight distribution
- height of fruit bins 80 cm
- fatigue-proof harvesting
- formittig and adjustable handlebars
- smooth harvesting
- efficient cleaning system
- permanently low costs for operation and maintenance

Efficient cleaning and gentle fruit conditioning

The well figured out conveying system ensures a fruit cleaning on the complete transport distance up to the fruit bin and guarantees a clean and trouble-free picking up - even with:

- conditions with high percentage of mulch und leaves
- bad weather conditions
- hillside situations or slanting positions

Technical datasheet *

Engine	4-stroke-OHC-engine, air-cooled, power 6,5 kW/9,0 HP
Gear/ Chassis	hydraulic drive, differential axle, interconnected gear box with 5 pre-selectable speed levels and idle gear, speed range about 0-7 km/h (forward and backward), fixing brake
Tyres	16 x 6.50 – 8 AS Super Grip
Working width	0,85 m
Fruit bins	3 fruit bins, filling weight about 25 kg per bin
Performance	about 1 – 2,5 t/h – depending on persons/logistic solution on site
Tare weight	about 250 kg
Optional Equipment	<ul style="list-style-type: none">➤ side raker, hydraulic drive➤ hour meter➤ steering brake for a turn-over on the spot

*) improving technological changes are reserved
